Project Plan

==Project Vision

Vision Statement

To build a dynamic, user-friendly platform where film lovers can discover, track, rate, and review movies—creating a personalized and social space for cinematic exploration and engagement

User Story

As a movie enthusiast, I want to log the films I've watched, rate and review them, and get recommendations, So that I can keep a record of my film journey and connect with others who share my tastes.

Goals

1. To create an information system that enables clients to search and sort within our database of films, actors and genres
2. Allow clients to create an account, search for films, rate and review them
3. Enable clients to follow other clients and read their reviews and ratings
4. Build an algorithm that creates recommendations for the client based on what they have liked, watched, enjoyed and interacted with
